

LE-600

Efficient and Low Noise Level

Whisper™ Blades in glass reinforced nylon. Incredibly quiet, strong and UV resistant.

High Power

Rare-earth neodymium magnets means more power, less weight.

Marinised

High quality marine grade surface finish protected against corrosion, as well as stainless steel fixings throughout

Mounting

Double fixing points. Mounts to a 60mm pole

Total Protection

Enamel and epoxy coated copper stator protected against the elements, yet open to cooling for improved efficiency.

Durability

Pairs of top quality SKF bearings for both rotor assembly and yaw pivot.

Lightweight

Strong aluminium chassis making the turbine weigh just 19.5 kg in total.
