

Free hot water!

SolarCache+, elegant and intelligent, automatically uses your excess solar power to heat your hot water. Get a year-round subsidy and switch off your boiler altogether in the summer!

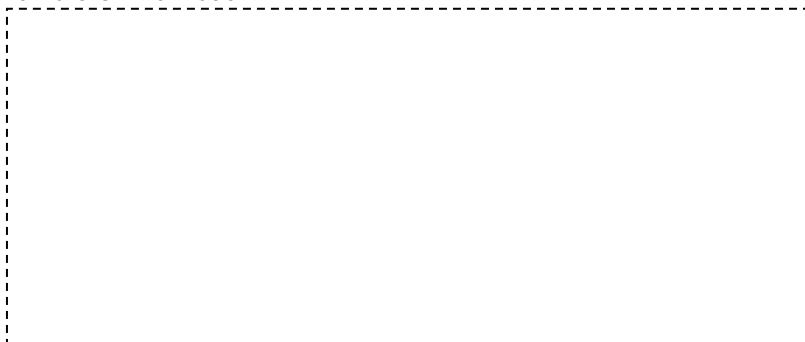

SolarCache+ is entirely automatic. No programming or setting up is required. Even the internal clock sets itself. Turn on the kettle and *SolarCache+* immediately adjusts. When the Sun comes out, *SolarCache+* immediately adjusts.

The *SolarCache+* bright and attractive colour display also shows you at a glance what you are saving and what you are using.

You can also top-up your hot water. Press a switch to get a one hour boost at anytime. Are you on economy 7? *SolarCache+* provides a night boost if you want it.

Make the most of your PV power. Let us fit *SolarCache+* to your system. Give us a call today!
