Application pack for the Technical Engineer role

Dear Applicant,

Many thanks for your interest in a role with us. Please find enclosed a description of the role along with some further information about what makes us tick.

To apply for the role, please complete the online application form at midsummerwholesale.co.uk/technical-engineer

We will be in touch as soon as possible with regards to your application - please bear with us though as it is a busy time for a small company.

We really look forward to hearing from you.

Yours faithfully,

Jamie Vaux,
Commercial Director, Midsummer

MIDSUMMER

Delivering tomorrow's energy

TECHNICAL ENGINEER

learn about the role

Are you enthusiastic about helping people and getting stuck into the technical details of a problem? Do you have an engineer's understanding of renewable energy systems - or the ability to learn?

We pride ourselves on being a distributor that offers a wide range of great products, but with the support of friendly and helpful service too. We need someone to take a technical lead for our grid-connected systems - assessing new products, understanding technical requirements, regulations and information, providing technical support to our trade customers, and organising and delivering training sessions internally to our sales team.

Tasks would include

- Dealing with technical support for customers
- Helping account handlers with technical enquiries
- Helping the purchasing team assess new products
- Test faulty returns
- Arrange internal and external technical training
- Help with product listings on our sites and software
- Advise customers on system designs
- Help with optimising internal processes

MIDSUMMER

Delivering tomorrow's energy

TECHNICAL ENGINEER

learn about the role

Who we are

We're primarily a distributor of components of renewable energy systems - from solar panels to batteries and heat pumps. We're unusual in offering software alongside that too.

Midsummer is a fast-growing company selling a range of renewable energy products, primarily to installation companies, from our offices in Cambridge and Dublin. We sell solar pv systems, battery storage, electric vehicle chargers, heat pumps and a variety of other associated products, and were recognised as the UK's best renewables distributor for 2020.

As an organisation, we have a strong environmental ethos and a passion for promoting the uptake of renewables, and our team share a belief in an open and honest approach to business. Find out more about our story, purpose and how we make sustainability, integrity and innovation central to what we do [here](#).

MIDSUMMER

Delivering tomorrow's energy

TECHNICAL ENGINEER

learn about the role

What it offers:

You'll be joining a fairly small team and see the results of your work from day one. Our office and warehouse work side by side, so you'll be sharing a dynamic, busy site with the rest of the staff.

You will learn a lot on the job, and we'll bring you up to speed as fast as possible. It's a fast-moving industry so new products, customers and technologies come along all the time - there will always be new things to learn. Our own tools are also evolving rapidly.

This is a full time role based in our offices on the outskirts of Cambridge, with a salary of £24,000-£28,000 depending on experience. Long term employees also take home a share of the profits of the company.

The role allows 25 days holiday per year plus bank holidays, and it's a friendly and dynamic office environment with an emphasis on teamwork, and a shared environmental ethos across the company as a whole.

Who we're looking for

You enjoy a challenge, and thrive in a fast-paced environment. You have a technical background and a head for numbers and theory, coupled with solid communication skills. You are able to take responsibility and show initiative when working autonomously, and able to create and implement new processes as we grow.

You enjoy a dynamic work atmosphere, and have a friendly and easy-going manner with co-workers and customers. You're happy to get involved with whatever needs doing, and eager to be part of helping a small company grow.

Experience in electrical engineering, technical troubleshooting, customer service or PV installations would be preferable - but it is far from essential, and recent graduates who want to begin a career in renewables would be equally welcome to apply. As long as you are hard working, work well on your own initiative, and have a smile on your face even at the end of a long hard day we'd love to hear from you!

Please complete the online application form at midsummerwholesale.co.uk/technical-engineer and send any questions to jobs@midsummerenergy.co.uk.

MIDSUMMER

Delivering tomorrow's energy

The UK's BEST renewables distributor.

MIDSUMMER

Delivering tomorrow's energy

From front room to boardroom

Midsummer began in the front room of a narrow boat. We're now moving into our 6th warehouse, have expanded overseas and we have a brilliant team of more than 40+ people across different parts of the business.

What we do

Our business is broken up into 3 key areas:

Wholesale distribution of renewable energy products including solar PV, EV chargers, battery systems and renewable heating in the UK and Ireland.

We also supply off-grid systems wholesale and to retail customers.

We also provide solar PV design software (SaaS) to installers, distributors and manufacturers in the UK and internationally.

The future

The transition to clean energy will touch on all aspects of modern life. Generating and storing clean energy at source makes ever more sense as we wean ourselves off fossil fuels throughout society. Electrification of transport is happening now, for heating it's coming soon, and intelligent home energy systems are just on the edge of mainstream. The wholesale industry is a key delivery mechanism for this transition.

Our Story

2005-2021

"I can't imagine a job I'd love more or a company I could be more committed to. Every single day we're moving renewables forward and I'm surrounded by a great bunch of people helping to do it."

Jamie Vaux, Commercial Director

Delivering tomorrow's energy

Growth

The snowball effect

Nearly doubling sales every year for three years isn't easy. But we have a winning formula and we're still picking up momentum.

We've come out of the pandemic growing fast again, and looking for new team members in all parts of the company.

Ireland office

We opened for business in Dublin in May 2019 and the team are going from strength to strength, currently recruiting a number of roles. The Midsummer formula is ideally suited to a new and growing market - it will not be the last expansion.

Off-grid experts

It's what we started out in and a market with huge potential as battery costs fall. We're pleased to have expanded that team recently and will be bringing our sizing tools to bear soon to revolutionise the market.

International software

Our easy-pv software is useful to any installer anywhere in the world (with some minor tweaks). We already have a growing international user-base and will continue to promote it widely.

MIDSUMMER

Delivering tomorrow's energy

Our Products

**PV Systems | EV Chargers | Batteries | Mounting |
Off Grid Systems | Renewable Heating**

We have a broad and considered range and carry a variety of product categories and brands. We're confident we can meet the diverse needs of our customers and their clients - and offer them top quality products. Fundamentally though, we won't sell products we don't believe in.

Solid brand partnerships

The suppliers we choose to partner with are extremely important to us. It's an ever-changing global industry, but we maintain consistent long-term relationships wherever possible.

Supporting innovation

We're proud that we were among the first wholesalers to supply grid-tie battery systems, tray in-roof mounting systems and the ever popular Zappi EV charger. We were also the first PV wholesaler to stock the Sunamp phase-change heat storage systems.

**1000+ products across 65+
unique brands, including...**

"By far the most innovative wholesaler to enter the renewable market."

Solar design made simple

We used to install solar PV systems ourselves - and found that we had to use 5 or 6 different software packages to complete a full design.

Every mounting system, every inverter brand, had their own design tool - and then you had to use spreadsheets and word processors to pull everything together and create a nicely formatted quote.

We shoehorned a design package together that did everything - and saved ourselves a lot of time and wasted effort!

When we gave up installations to concentrate on distribution, we realised our design tool was actually one of our greatest assets. We put a huge amount of effort into improving it and making it available to our distribution partners. It's now used by hundreds of people every day to design PV systems. And because it connects seamlessly to our e-commerce website, it makes it easy for users to purchase from us. We have seen our sales grow enormously as a result

Our integrated solar design software simplifies design, paperwork and ordering into one neat package. It :

- Draws roofs to scale
- Automatically creates solar array layouts that make best use of the available space
- Designs the mounting system and undertakes structural calculations
- Selects an appropriate inverters and undertakes stringing calculations
- Specifies electrical components such as meters and isolators
- Creates a schematic
- Produces shading & yield calculations
- Generates a professional quote and technical report
- Makes financial projections for the customer
- Auto-completes commissioning forms
- Connects to our websites for rapid ordering

15,000

designs a year
(and growing rapidly)

MIDSUMMER Leadership Team (UK)

Delivering tomorrow's energy

Dr. Andy Rankin, Founder

A former climate scientist who started a solar company from his off-grid home 15 years ago. Andy likes to build things from scratch, whether that's companies, houses, solar farms, software or freight bikes. Certainly the only MD in the industry with ultra-running titles under his belt.

Jamie Vaux, Commercial Director

An environmental business enthusiast who went looking for a company to throw his idealism at, Jamie has spent 10 years chasing sales and building the Midsummer team. If he's not frowning at his phone, you'll find him lifting something heavy or cooking.

Lowri Goodyer, Sales Director

A fellow eco-crusader, Lowri heads up the UK sales team as well as looking after the company's finances and admin teams - and climbing, surfing, running, snowboarding or gardening when she wants a rest!

Tom Livesey, Operations Director

Tom keeps the wheels of Midsummer turning. From purchasing to logistics and a good dose of technical sales too, his immense product knowledge is only rivalled by his knowledge of craft beers, gourmet recipes and fantasy football tactics.
