

Large commercial charging

Easee Charge

easee®

The Easee Charge maximises the available electrical capacity within a building using dynamic load and phase balancing. With the ability to connect 101 chargers to the same fuse, and charge up to 22kW, this is the ultimate solution for delivering EV-Charging at scale for apartment blocks, workplaces, car parks and fleet.

22_{kW}

Full of power

The charger can charge on both 1 and 3 phase and supports charging up to 22 kW. It has a Type 2 standard charging connector.

10_x

Quick charge

With Easee Charge, you can charge up to 10x* faster than with a regular outlet. It charges as quickly as possible with the available capacity and provides you with the highest charging power.

*10 times faster charge requires a 3-phase installation. With 1 phase you will still get 3 times faster charge.

101_{chargers}

Load balancing

Easee enables load balancing of up to 101 Charging Robots on a single circuit. It can operate both online and offline. Requires WiFi mesh in larger facilities for 100 % operating guarantee.

24_{/7}

Always updated

The Charging Robot is updated with new features continuously. This way, you know that you have purchased a safe and future-proof product.

eSIM

Internet access

All our Charging Robots are connected to the internet through mobile network*. If you buy now you get free mobile internet access throughout the lifetime of the product. In order to get software updates and increased redundancy, we recommend installing a local WiFi network, if there is no cellular coverage. The local WiFi network must be connected to the Internet.

*Assuming cellular coverage is available.

3_{yr}

Warranty

We want you as a customer to have confidence that you have bought lasting quality. A product from Easee comes with a 3 year warranty.
