

Smarter Heat Pump, Smarter Home

Homely's smart controller optimises your heat pump to give you complete comfort while **reducing your energy bills**

Save Money on Energy Bills

- Reduce heating bills by 31% when used with a time of use tariff
- Increase efficiency by 22% on a fixed rate tariff*

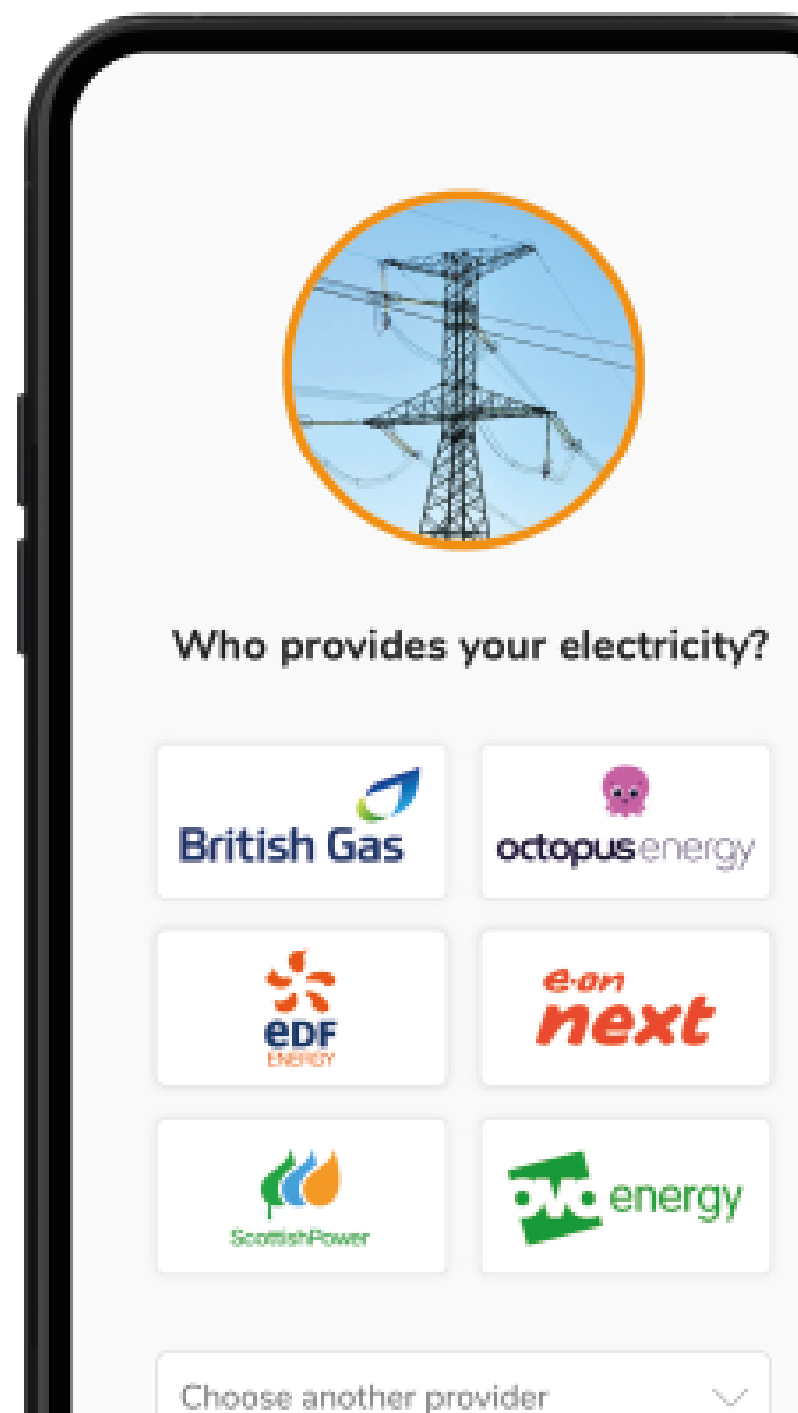

Complete Control

- Easily set schedules and boosts, all from your smartphone

Smart Tariff Optimisation

- With a Smart+ subscription take advantage of time of use tariffs to save more money

*As tested by Energy House Labs

Unlike traditional thermostats, Homely was designed specifically for heat pumps. It discreetly connects to your heat pump and uses real-time data from your home, combined with advanced weather forecasting and other data, to ensure your heat pump is always set to deliver maximum comfort at the lowest cost.

Smart+ subscribers can save even further, as Homely can further optimise your heat pump to run during times of low electricity prices, to take advantage of off-peak tariffs.

“My experience of Homely has been effortless... it couples perfectly with my time-of-use tariff and is super-efficient... My energy costs have gone down significantly. Plus the app is brilliant – very simple, set-and-forget.” – **Conor, Greater Manchester**
