

Unlock the Full Potential of Your Heat Pump with Homely

Why Settle for Less?

Your installer has recommended Homely for a reason—because they care about giving you the best possible heat pump experience. Homely isn't just another controller; it's your key to making sure your heat pump runs at its absolute best.

Maximise Savings, Maximise Comfort

Homely ensures your heat pump operates at peak efficiency, reducing energy costs without compromising comfort. Independent tests show Homely improves heat pump efficiency by up to 22%. With Smart+ mode, you can boost those savings even further—up to 31%!* Why pay more for your energy bills?

Take Full Control - Wherever You Are

With Homely, control is always at your fingertips. With our user-friendly app, you can manage your heating schedules, adjust temperatures, or activate holiday mode - no matter where you are.

*Savings as verified by Energy House Labs. Smart+ mode requires a £25 annual subscription.

Who provides your electricity?

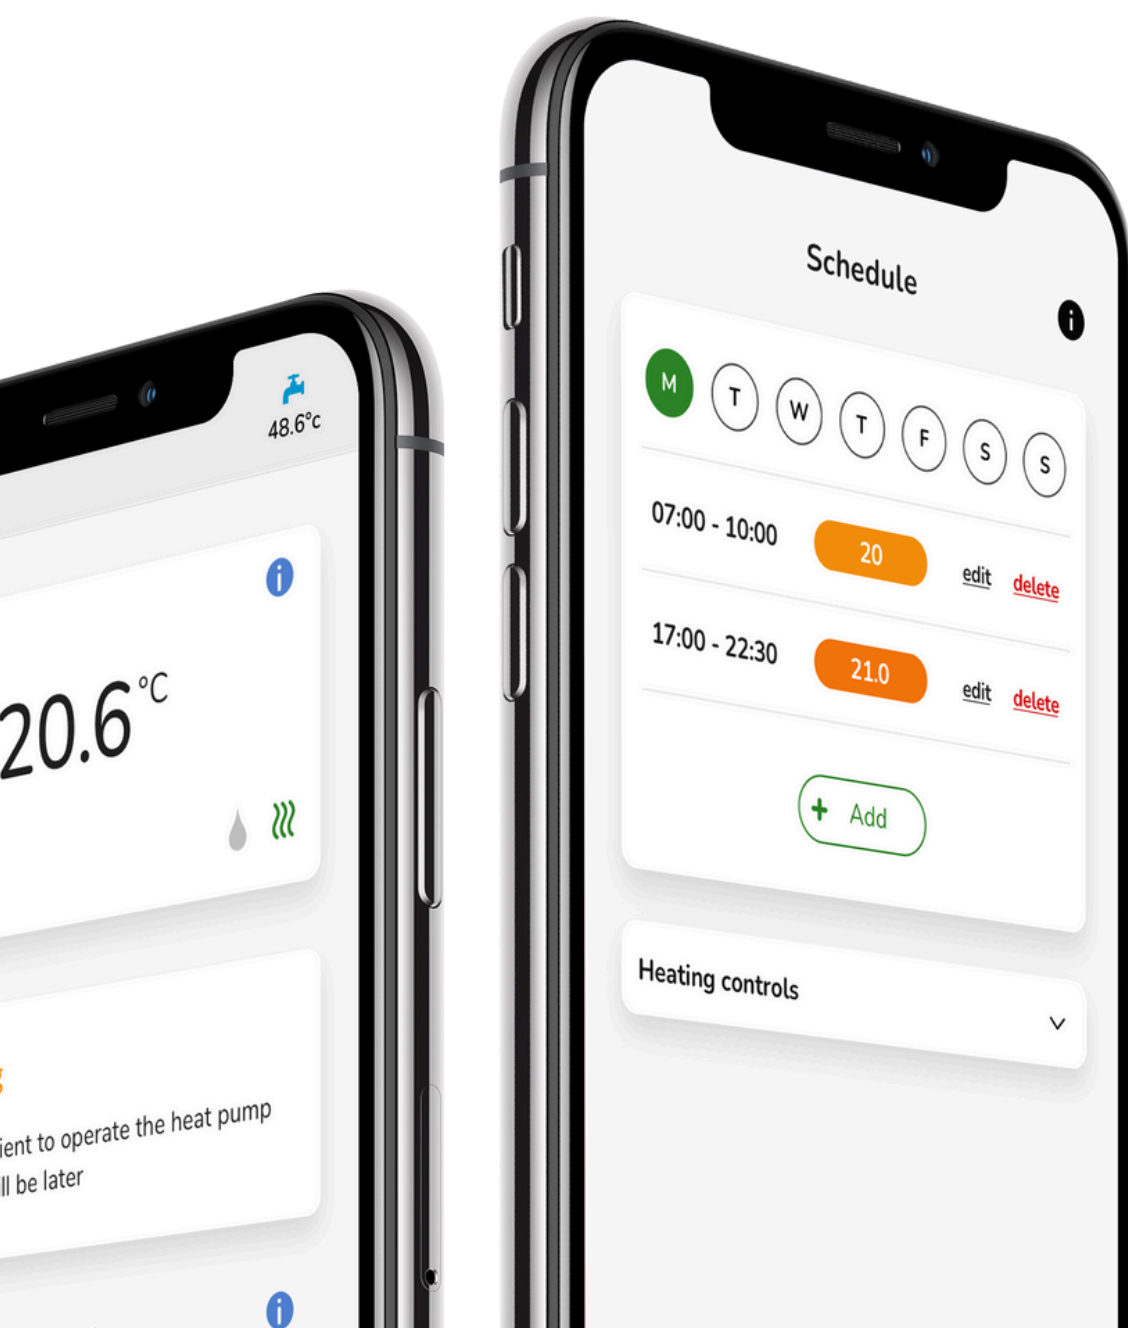

Smart Technology, Simple Solution

Homely may be small, but it packs a big punch. It discreetly connects to your heat pump and uses real-time data from your home, combined with advanced weather forecasting and other data, to ensure your heat pump is always set to deliver maximum comfort at the lowest cost.

Tailored for Heat Pumps, Not Just Another Thermostat

Unlike traditional thermostats, Homely was designed specifically for heat pumps. It knows when and how to tweak your system to keep your home perfectly cosy, in the most cost-efficient way, giving you peace of mind all-year-round.
