

**ECO4
Installer Checklist**

ECO4 Checklist

This checklist ensures you have the installation evidence to claim ECO4 funding with the Homely Smart Controller.

Pre-Installation Eligibility

Ensure the customer is happy controlling their heat pump with an app.

The Homely customer app is available on the App Store and Google Play.

The Homely Hub requires a Wi-Fi connection.

Post-Installation Evidence

STEP 1

Place the Homely Introduction Label on a flat surface next to the Homely Hub. Take a photo of the label next to the Hub, an example has been provided below.

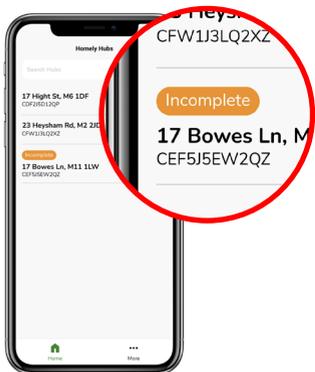

STEP 2

Take the following screenshots of the Homely installer app.

Screenshot 1

Screenshot the “Home” page with the details of the installation you are claiming for. The installation’s address and serial number must be visible without the “Incomplete” status.

Installation is **NOT** complete
Do not use this screenshot

Installation **IS** complete
Use this screenshot

Screenshot 2

Select the installation from the “Home” screen and select “Heat Pump Modbus”. Screenshot this page ensuring “Modbus time” is visible.

The “Modbus time” should display a time **AFTER** the installation.
