

# iSolarCloud

SUPERIOR  
MONITORING.  
HIGHER YIELD.

## FAST

The iSolarCloud wizard guides you through commissioning in a breeze.

## EASY

Enjoy the most user-friendly monitoring with live data and automated reports.

## SMART

Benefit from remote parameter setting and troubleshooting from wherever you are.

## CONNECTED

Share your power plants with colleagues and end-users.

## FUTURE-PROOF

Be always up to speed and get new features and frequent updates.

## SAFE

Your data is secured on a European server and is 100% GDPR compliant.

# 8 PRO TIPS

## FROM THE PRODUCT MANAGER

**Eleonora Potestio**  
iSolarCloud Product Manager  
Sungrow Europe

**1 EUROPEAN SERVER**  
Choose the European server when registering. This will ensure that your data will be secured GDPR compliant.

**5 PLANT SHARING**  
Set an access for end-users by adding their email-address in the commissioning process.

**2 LOCAL ACCESS**  
Set inverter parameter via Bluetooth or WLAN module if an internet connection is not available. Login with user name "user" and password "pw1111".

**6 PRESENTER MODE**  
Switch to the grid view to visualize multiple plants. Show real time data, total yields and your commitment to clean power for all.

**3 SMART REPORTING**  
Get automated reports by email on a daily, weekly or monthly base and share them with multiple colleagues.

**7 DETAILED DATA**  
Jump into the live data section and check the total active power, as well as the phase voltage and current data with 10 second resolution.

**4 ADVANCED REPORTING**  
Check each inverter data as diagram or export excel tables for your own analysis.

**8 PERSONALIZED PLANT**  
Upload an image and add an address to personalize the pv power plant.
