

InstantCharge.

InstantCharge utilizes Monta's QR codes, and is the fastest and easiest way for a new user to access a Monta charge point. It allows a user to access a charger, start a charge, and pay - without ever downloading the app.

The main purpose of **InstantCharge** is to provide a smooth and seamless first experience with Monta, ensuring that new users, at the very least, can start a charge without any issue.

Instant Charge is activated by:

- Scanning a QR code, or the NFC-tag inside a Monta QR-sticker.
- Opens Apple's **App Clips** or Android's **Instant Apps** functionality
- Allows user to start a charge and pay the **public tariff** on the charge point

Notable limitations of InstantCharge include:

- Cannot queue for a charge point
- Cannot pay Team tariffs
- Must enter email address to receive receipt
