

Modular

Ground Screw

Installation: By hand and/or with drilling machinery

Material: Q235 steel. Hot dip galvanized to DIN EN ISO 1461

Dimensions: Pipe - 68 x 2 x 1200mm.

Flange - 120 x 5mm

Type of Mounting

The Ground Screw mounting system uses steel ground screws that can be driven in by hand tools or machinery as the foundation basis for this system.

Applications and Benefits

Similarly to the X Anchor, the Ground Screw foundation does not require heavy machinery for installation as it only requires shallow embedment.
