

# Single Row Groundmount – Datasheet

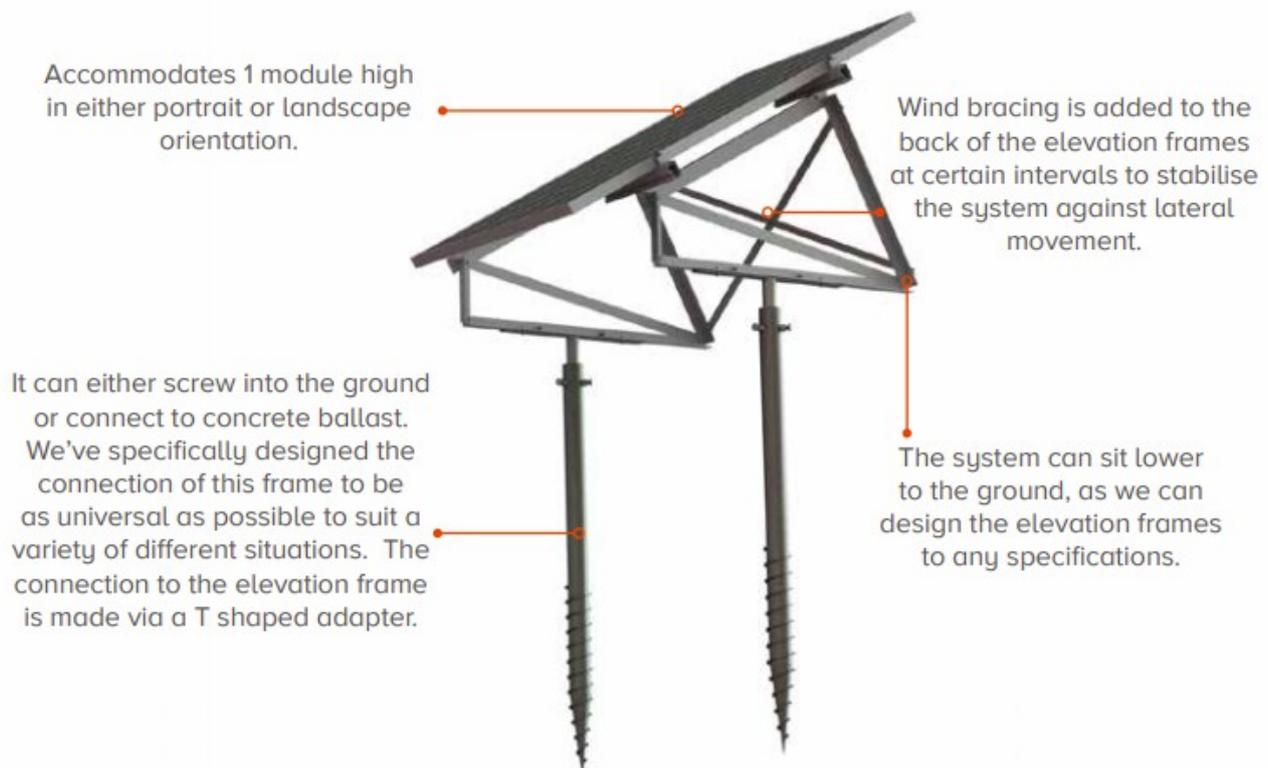

Module Orientation : Portrait or Landscape

Angle : 30°

Weight : 9.16 kg/m<sup>2</sup>

Material : Aluminium, stainless & galvanised steel (EN ISO 1461)

Protection: Steel galvanised at 400g/m

The elevated frames are made in the UK, which allows you to tailor them to any specification. So whether you need 900mm or 200mm between the solar panel and the ground level, we can incorporate this, together with any angle required, to suit your individual project.

Ballast feet options available also.
