

COMBI BALL VALVES

Introduction

Inta's range of combination ball valves are a neat and convenient way of combining both an isolating ball valve and y pattern strainer in one fitting. Reducing installation time and increasing the lifespan of serviceable components by protecting them from foreign debris.

- Combines a y pattern strainer and isolation valve
- Available in 15 & 22mm and 1/2", 3/4" and 1"
- Full bore fitting
- Supplied with 400 micron mesh filter
- Solid brass construction
- Max working pressure 16 bar
- Maximum working temperature 180°C

Description	Code
inta combi ball valve 15mm	CBV15
inta combi ball valve 22mm	CBV22
inta combi ball valve 1/2"	CBV12
inta combi ball valve 3/4"	CBV34
inta combi ball valve 1"	CBV1
