

Modular

SpiraFix

Installation: Steel screws driven in with hand tools

Material: Sheradised Steel

Dimensions: 50mm x 1050mm (for loads up to 1600Kg)

Type of Mounting

The SpiraFix mounting system uses SpiraFix steel ground screws that can be driven in by hand tools as the foundation basis for this system.

Applications and Benefits

Similarly to the X Anchor, the SpiraFix foundation does not require heavy machinery for installation as it only requires shallow embedment.
