Smart energy control for the modern home
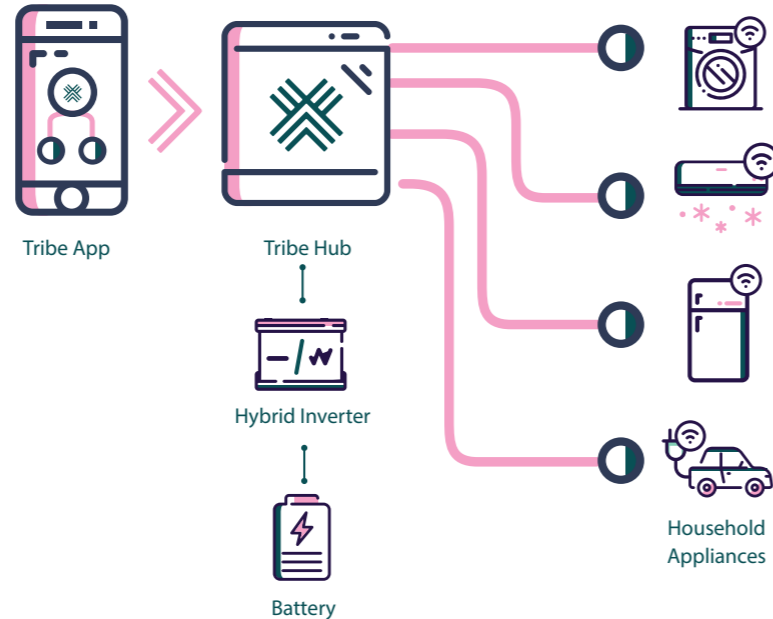

tribe

what is **tribe**?

Tribe is a smart energy management system, which monitors and optimises the generation, storage and consumption of electricity in your home to reduce your energy bill.

The Tribe Hub connects to the distribution board and a wide range of devices in your home. By learning consumption patterns, and checking live tariff and weather information, the Hub ensures all connected devices maximise use of clean, low cost electricity.

The Tribe App provides visibility of your generation, storage and consumption of electricity in real time. You can control and schedule devices remotely, and track energy bill savings generated by Tribe.

Tribe App

Household Appliances

tribe features

Tribe is designed to be the hub of the smart home. Through its market-leading compatibility with a wide range of connected devices – including solar inverters, batteries and electric car chargers – Tribe gives you the ability to monitor and optimise your energy use, and the comfort in being able to control and schedule devices when required.
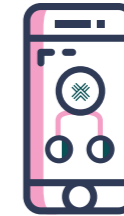

Real-time monitoring

of generation, consumption and storage of electricity at device-level.

AI-powered optimisation

of devices using learnt consumption patterns, tariff and weather information.
* Coming soon

Control & scheduling

of individual loads to maximise comfort and energy utilisation.

Energy performance tracking

including household monetary and carbon savings.

How **tribe** works

Your Tribe App monitors in real-time your house consumption, generation and storage at device-level. The Tribe App also enables you to control and schedule devices to take advantage of the free solar energy you're generating or low-cost electricity from the grid. If you'd rather let Tribe optimise the scheduling of devices automatically, the App and Hub will take advantage of the in-built AI to identify the cheapest periods to operate your devices before auto-scheduling each load to exploit these.
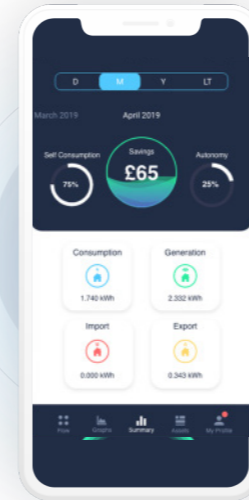

The App

Monitor

With sub-second metering of up to six individual loads via the Hub, the App gives you visibility of your home's consumption, generation and storage in real-time. You can also view historic data to compare how your energy consumption and generation has changed over time.
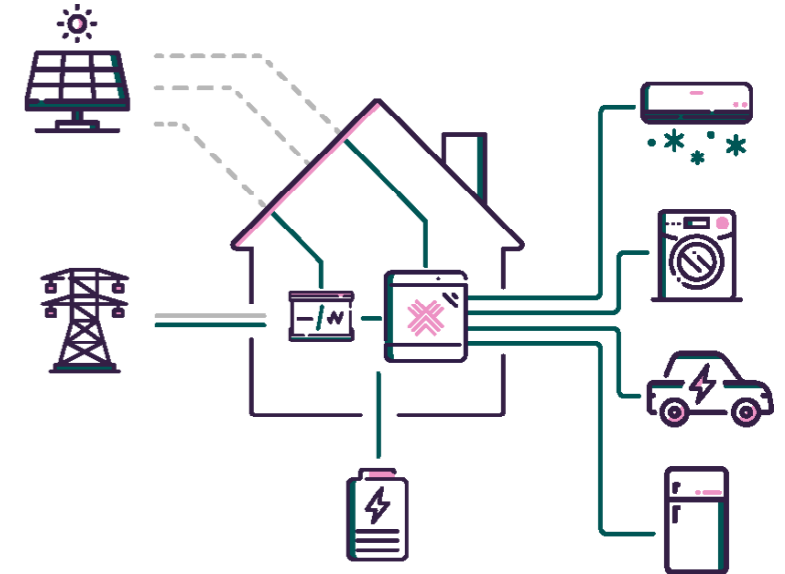

Optimise

If you'd rather let Tribe decide when devices should switch on or off to take advantage of free solar energy or low-cost electricity from the grid, the Hub and App will work together to learn your home's energy patterns, tariff and weather information, before auto-scheduling devices to ensure they're consuming or storing electricity at the cheapest times.

Save

The Tribe system integrates with all major loads in your home so you can go about your day safe in the knowledge your home is always being optimised to help you make the most of the solar energy you generate, and any low-cost electricity from the grid.

The Hub

tribe for you, and the planet

Tribe gives you control of your energy and helps reduce your bills. And by ensuring you use more of the clean solar energy you generate, Tribe helps accelerate the transition to a zero-carbon world where energy is both sustainable and low-cost.

Reduce your energy bill

by up to 20% p.a.*

* Based on a U.K. household with 4,300kWh annual demand, a 3.68kWp PV and 6kWh battery installed, and access to Octopus Energy's Agile tariff.

Increase energy autonomy

and independence from the grid

Protect against rising electricity tariffs

by reducing your reliance on the grid

Reduce your carbon footprint

by using more solar energy and avoiding import during peak times

Increase home comfort & convenience

by monitoring and controlling all devices from one place

How do I get **tribe**?

Step 1

Check Tribe is compatible with the solar, battery and electric vehicle charging technology you have installed in your home

Step 2

Visit go-tribe.com to contact your nearest Tribe Partner and book in your installation

Step 3

Sit back and relax while your Tribe Hub is installed and connected to the devices you want to monitor and control

Step 4

Download the Tribe App and start enjoying all the benefits of Tribe!

Be smart with your energy with *tribe*
