## Free Standing Mounting System TRIC F

**ES** INSTRUCCIONES DE MONTAJE

## Estructura de montaje para tejado plano TRIC F

**IT** ISTRUZIONI DI MONTAGGIO

## Struttura di supporto per piano TRIC F

**EN** **Important Notes**

- The dimensioning of the mounting system (number of mounting triangles) should be specifically carried out for each individual project, following the specified structural engineering standards and regulations.
- Prerequisite for the proper application always is a solid mounting base that can accommodate the occurring forces (weight, wind and snow loads).
- The installation instructions of the solar module manufacturers must be adhered to.

**ES** **Observaciones importantes**

- Hay que realizar el dimensionamiento del sistema de montaje (número de triángulos) según cada proyecto y conforme con la normativa vigente.
- Comprobar las condiciones de suelo o tejado que va a soportar las fuerzas de nieve y viento.
- Las instrucciones de instalación del fabricante de los módulos deben ser cumplidas.

**IT** **Informazioni importanti**

- Il dimensionamento del sistema di montaggio (Numero dei triangoli di supporto) deve essere eseguito considerando le norme rispettive.
- Deve essere garantita un'adeguata sottostruttura per il montaggio cioè di una sottostruttura in grado di sostenere le forze (peso proprio, carico di vento e di neve) che si verranno a creare.
- Rispettare le prescrizioni di montaggio del produttore dei moduli.
